**Subject:** [External] Comment for Docket No. 2023-9-E - Request for Public Hearings

I am a fulltime citizen of Beaufort County, and I am writing to request that the SC PSC hold open hearings on the Dominion IRP case. The utility's submission of their latest IRP is wholly biased toward fossil-fueled based plants, and ignores the cleanest, fastest-to-build, and most economically cost efficient technology available.

The citizens need a chance to voice our needs and objections in front of the SC PSC for this massive capital decision. The construction costs and ongoing fuel pass-through costs will affect our energy prices for decades into the future.

Thank you  
Anne
